## A new landmark in the ceramic industry

Landmark ceramics is an American company, based in Tennessee that has set out to research, manufacture and sell top quality porcelain ceramics in North America. Technological innovation, market presence, attention to detail, the welfare of people and the environment, efficient service and a thorough product range make Landmark a new benchmark in the North American market for those who are looking for a reliable partner for any building and architecture project using US made top quality porcelain tiles.

"Design Work" is a framework of ceramic surfaces for contemporary architectural projects. The floor and wall collections play with evocative materials drawing out sophisticated ceramic combinations with new design materials. Design Work is synonymous with design freedom: the colors are chosen to maximize the possible combinations between collections and within them. This creative freedom is dynamic and durable, thanks to the technical characteristics of porcelain stoneware, for use in a variety of elegant, modern residential and commercial environments.

A refined reprocessing of materials combines the strength of ceramic with the memory of fabric, endowing residential and commercial rooms with warmth, strength, softness and countless design possibilities. The Soul collection offers visual and tactile suggestions of elegant furnishing fabrics.

Rooms have an elegant charm and a contemporary look and can be lived in freely because of the excellent technical performance of porcelain stoneware.
